TRS Glossary of Terms

Term	Description
Adverse Party	The party from whom you are seeking to recover damages.
Attached Evidence	The collection of all the evidence items attached to a section of the case (<i>Liability Arguments, Damages, Jurisdictional Exclusions, etc.</i>).
Case	A collection of liability arguments and damages for a set of parties involved in the occurrence.
Case ID	The numeric identifier for a collection of recovery and response submissions that belong together (i.e., under the same liability decision).
Coverage	The scope of protection provided under an insurance policy under which a company has paid a claim.
Discontinued	Status of an occurrence when no further activity is allowed but the occurrence information is still searchable and viewable to the parties.
Evidence Attachment	An evidence item that the party has inserted into the damages or liability section to support specific arguments. Arbitrators are required to comment on any evidence linked in the <i>Liability Arguments</i> section.
Extension	A postponement of the response due date by a Responding Party to prepare and submit its response. A Responding Party may request only one extension; a fee is incurred.
Feature	A set of damages for a claim. For Automobile Collision and Comprehensive/OTC damages, a feature is identified by the vehicle year, make, and model.
Filing ID	The numeric identifier for a decision on a case.

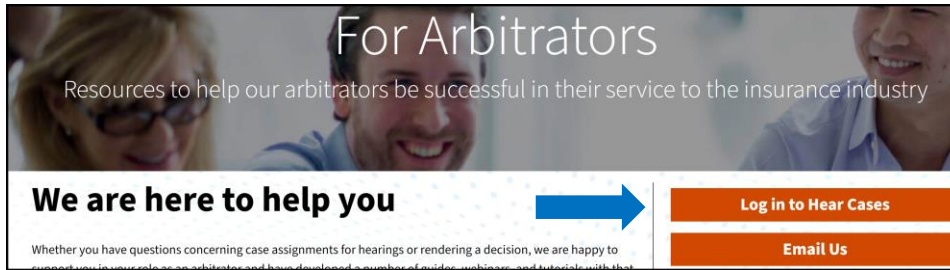

Insert Evidence Attachment	An option to link evidence within your liability argument. Arbitrators must comment on all inserted evidence.
Jurisdictional Exclusion	Argument that does not address dispute itself, but rather raises an objection to compulsory arbitration’s jurisdiction.
Occurrence	An event that results in an insured loss.
Placeholder	An indicator for known evidence that is not available during the initial entry and is identified in the case. The evidence must be uploaded to the placeholder prior to submission.
Revisit/Rebut	Allows a party to address issues raised by the Adverse Party regarding damages, jurisdictional exclusions, newly impleaded parties, and policy limits.
Void Decision	Removes a decision from a case. Voiding a liability decision will discontinue the occurrence.
Withdraw	To remove a feature from arbitration prior to hearing. This may be done because the damages have been settled, the wrong company was named, the responding company denied coverage, or the policy has a liability deductible or a self-insured retention; or it is discovered that the case does not qualify for TRS.

Accessing TRS

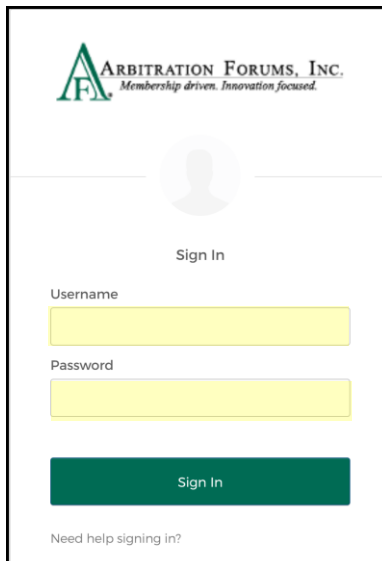

To login as arbitrator, select the tab labeled **For Arbitrators**.

Next, select the **Login to Hear Cases** (orange tab).

Enter your arbitrator Username and Password.

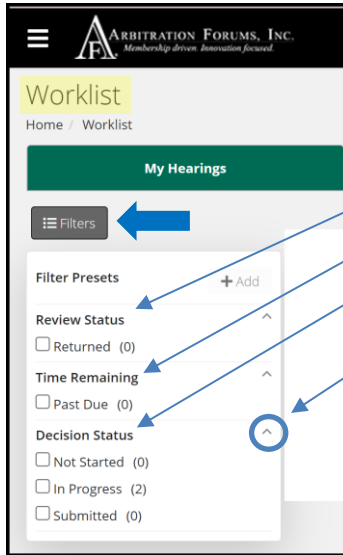

After logging in, select **TRS Arbitration**.

Once in TRS, go to the **My Hearings** tab.

From the arbitrator **Worklist**, a **Filters** tab is visible. This tab offers an easy way to filter down your search using the most important properties available. Arbitrators can close the **Filters** tab by clicking it once. Clicking it a second time will open it again.

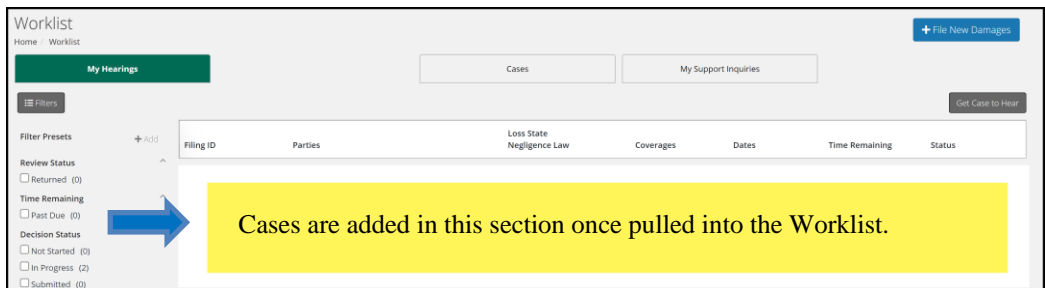

Filters include:

- Review Status
- Time Remaining
- Decision Status

Filter options can be expanded or collapsed using the arrows found to the right of each section.

The arbitrator’s **Worklist** is blank upon logging in (first-time users). Once a case is pulled from the queue, it will be visible in the section highlighted below.

Additional Worklist tabs include **Cases** and **My Support Inquires**.

The **Cases** tab is to reference cases filed and/or responded to in TRS by your company.

My Support Inquires tab shows cases with pending questions.

Decision Entry Neutrality Statement

Objectivity and neutrality are the foundations of a credible arbitration system. All decisions must be based solely on the arguments made in the contentions and the evidence submitted by the parties to avoid any perception of bias on the part of the arbitrator.

In addition, an arbitrator must excuse himself/herself from hearing a case if he or she has a direct or indirect interest in the outcome (financial, business, personal, or professional). We also recommend that arbitrators excuse themselves from hearing a case that involves a prior employer or co-worker or claim adversary if their decision could create an appearance of impropriety.

AF policies also help ensure the privacy and confidentiality of our membership's data. The Neutrality, Privacy, and Confidentiality statement reinforces to arbitrators that the information submitted by parties is private and confidential and may only be used to resolve the dispute. It may not be copied or printed or used for any other purpose.

For the above reason, arbitrators must acknowledge that they have read and understand the Neutrality, Privacy, and Confidentiality Statement by selecting "I Agree To Hear This Case". If you are not able to hear an assigned case, you are advised to call AF Support.

How to Review Evidence

Parties in arbitration should attach evidence to support their arguments/assertions.

Evidence is typically attached to the relevant section within a Workflow Step (Liability/Damages) for arbitrator review and consideration.

For new Auto filings, attached evidence supporting feature damages sought will be viewable to the Responding Parties (Rule 2-1).

For new Auto filings, attached evidence supporting disputed damages will be viewable to the Recovering Party and other Responding Parties, if applicable (Rule 2-5).

Evidence supporting Feature Damages must be attached to the Damages section in order for the shared badge to appear (Collision, Comprehensive/OTC filings only).

In Auto filings where the shared badge is not present, the arbitrator will not consider these damages, if disputed.

Arbitrators can also view evidence in one location by selecting **Decision Actions** and **View Evidence** from the drop-down.

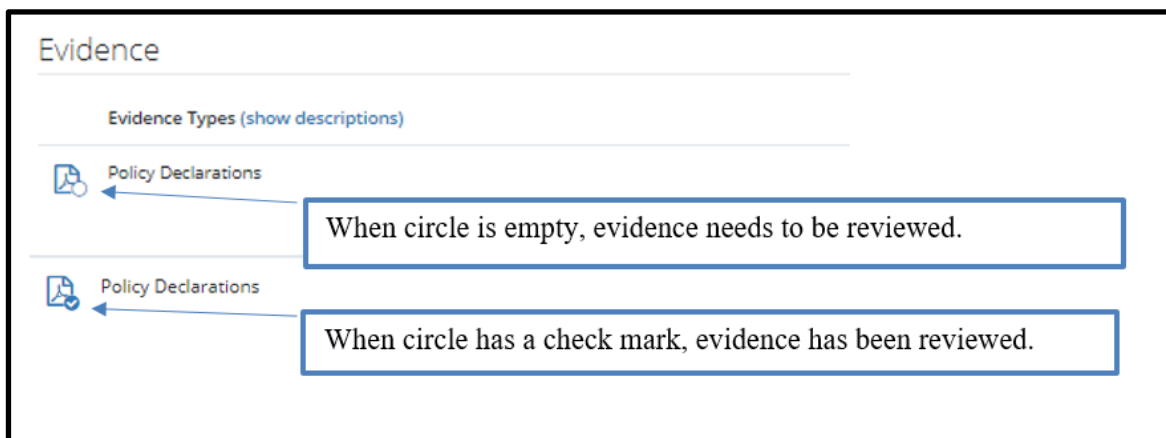

It can also be accessed by going to the **Review Evidence** section found in the **Workflow Steps**.

As arbitrator, you must review all evidence attached to the case.

This is achieved by selecting the **PDF icon** adjacent to the **Evidence Type**.

Selecting **View All Evidence** opens all evidence in that section at once.

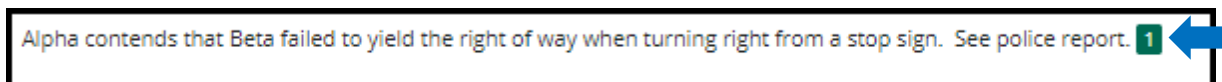

When selecting **View All Evidence**, click the left or right arrow to scroll through each evidence item attached to the case.

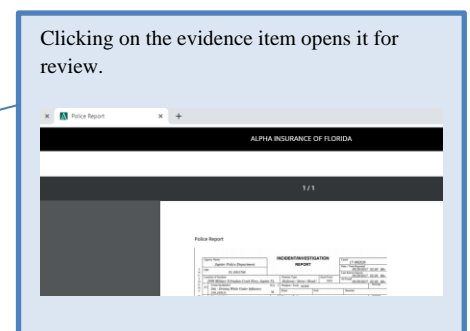

Hovering over the PDF icon reveals **View Document** or **Viewed** as the current status of the evidence item. Evidence must be in “Viewed” status before a decision can be submitted.

Evidence denoted with a green box can be viewed as shown above or by selecting the green box directly.

After selecting the green box, the following message will appear.

Note: Evidence Sharing for Collision and Comprehensive/OTC Cases Only

For New Auto Filings

Attached evidence supporting feature damages sought are viewable to Responding Parties (Rule 2-1).

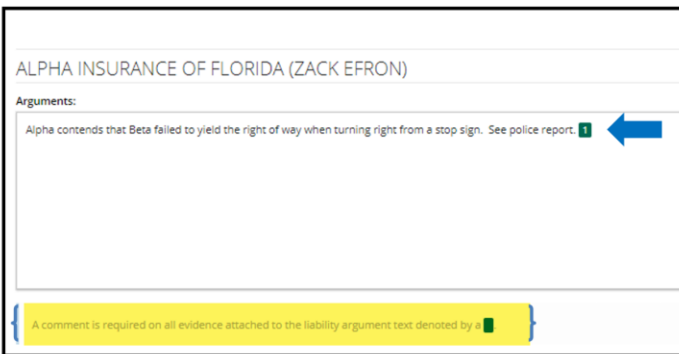

Attached evidence supporting disputed damages will be viewable to the Recovering Party and other Responding Parties (Rule 2-5).

Evidence submitted by the parties to support or dispute supplemental damages will be viewable by the parties.

When raising a damage dispute, failure by the parties to attach supporting evidence to the feature damages sought or disputed damage sections may cause the arbitrator to not consider it.

Enter Comments

Evidence denoted with a green box **requires** a comment. If evidence is inserted into the liability/recovery arguments section, a green box will appear (see below). Select the green box that appears in this section.

The following pop-up will appear. Select the evidence to view it.

To learn how to view evidence, go to **How to Review Evidence** in this guide.

Once the evidence is viewed, enter comments in the field provided and select **Save**.

After saving the comment, a comment bubble appears.

Comments can also be entered when evidence is attached to the **Evidence** section. To enter a comment, select the + **icon**.

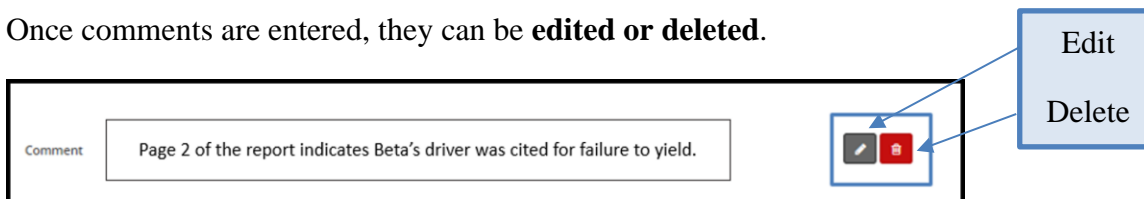

Comments should include “How and Why” the evidence proved or failed to prove the arguments raised.

Enter comments and select **Save**.

Once comments are entered, they can be **edited or deleted**.

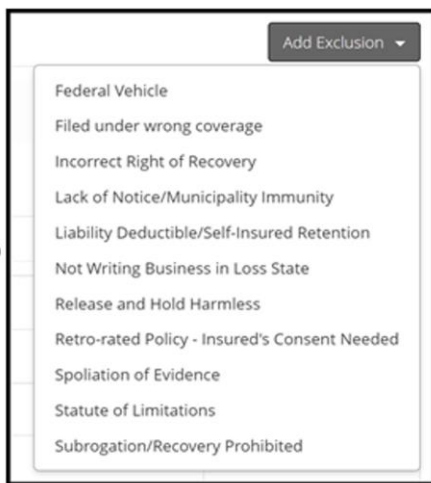

Findings/Jurisdictional Exclusions (JE)

Jurisdictional Exclusions (JE) are arguments that do not address the dispute itself, but rather raise an objection to compulsory arbitration’s jurisdiction. This step allows the arbitrator to enter decisions on jurisdictional exclusions raised by Adverse Parties.

A case “in jurisdiction” means it **does meet** AF’s compulsory agreements, and the arbitrator will hear the case and render an award.

A case “out of jurisdiction” means it does **not meet** AF’s compulsory agreements, and the party raising the Jurisdictional Exclusion (JE) cannot have a decision rendered against them.

Jurisdictional Exclusions (JE) may vary depending on the coverage selected.

When hearing a case, Jurisdictional Exclusions will appear in the **Hearing Workflow Steps** as **Findings**.

If policy limits are an issue, arbitrators will determine if they are proven, not proven, or need to be adjusted based on the evidence submitted.

This ensures awards do not exceed the stated policy limits (**does not apply to New York PIP**).

Exposure Ruling Card (Does Not Apply to New York PIP)

When additional exposures are added, the **Exposure Ruling** section will appear. Arbitrators will select the **Review** tab and review the amounts and descriptions of each exposure before a ruling is made.

Based on your ruling, TRS will automatically deduct **proven valid** exposures from the proven policy limits to ensure awards do not exceed limits. See Policy Limit Worksheet for more information on how exposure rulings appear on the policy limits worksheet.

Amount/Description	Proven Valid	Proven Paid Amount	Proven Unpaid Amount	Proven Undetermined
* Amount: \$3,500.00 Paid tree and fence damage.	—	—	—	—
Total: \$3,500.00	Total Proven:	\$0.00	\$0.00	

There are three types of exposures: Paid, Unpaid, or Undetermined.

Paid Exposures – Proven paid exposures directly impact the policy limits available for the case. These exposures are automatically deducted from the proven policy limits available on the case and can cause a party to be marked as out of jurisdiction (OOJ) by the system. This occurs when the proven paid exposures exceed the policy limits available for the incident or the feature.

Unpaid Exposures – Unpaid exposures are exposures that have not been paid. These exposures result in the OOJ statement being displayed on the policy limits worksheet. The arbitrator must make a decision if these unpaid exposures put a party or feature OOJ.

Undetermined Exposures – Undetermined exposures are exposures that have not been quantified. These exposures result in the OOJ statement being displayed on the policy limits worksheet. The arbitrator must make a decision if these undetermined exposures put a party or feature OOJ.

Statute of Limitations

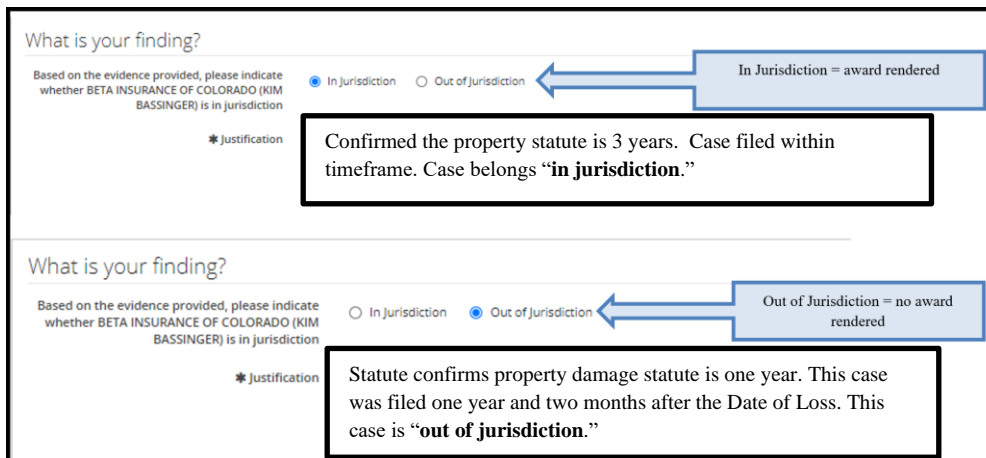

If other jurisdictional exclusions are raised other than policy limits, arbitrators will determine if the case is **in jurisdiction** or **out of jurisdiction**.

Review the jurisdictional exclusion raised (highlighted in yellow). Next, review the attached evidence and add comments that explain how the evidence proves or disproves the exclusion asserted.

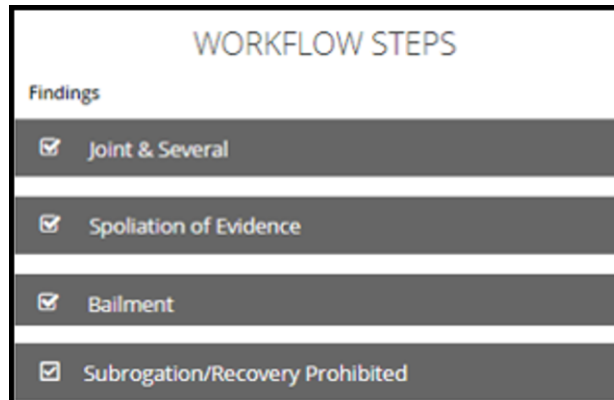

After reviewing the evidence, provide your “Finding,” either **On Jurisdiction** or **Out of Jurisdiction**.

Select the appropriate radio button.

Joint and Several Liability, Spoliation of Evidence, Bailment, and Subrogation/Recovery Prohibited

The following jurisdictional exclusions apply to other coverage groups and not to New York PIP filings.

The screenshot shows a 'WORKFLOW STEPS' interface. Under the heading 'Findings', there is a list of four items, each with a checked checkbox:

- Joint & Several
- Spoliation of Evidence
- Bailment
- Subrogation/Recovery Prohibited

Other assertions, such as those listed below, require the arbitrator to first determine if it applies to the loss state, not the case itself.

- **Joint and Several Liability:** When multiple parties can be held liable for the same event or act and be responsible for all restitution required.
- **Spoliation of Evidence:** The intentional, reckless, or negligent withholding, hiding, altering, fabricating, or destroying of evidence. Spoliation of evidence will only be asked on coverages related to auto, special, and property.
- **Bailment:** A change in possession of property without a change in ownership. The owner expects property returned in as good or better condition.
- **Subrogation/Recovery Prohibited:** An assertion there is no Right of Recovery in a specific state for PIP or Med Pay payments paid for settlement to injured parties.

For example, Joint and Several Liability is asserted, and the loss state is Arizona. You will determine if this is correct based on the evidence submitted. (Does Arizona allocate awards based on Joint and Several Liability?)

After reviewing evidence, enter your **findings** by selecting **Yes** or **No**. Then, provide a **justification** for your finding.

What is your finding?

Based on the evidence provided, does Joint & Several apply in this jurisdiction? Yes No

* Justification

Loss state is Az.
 Joint and Several Liability does not apply.

You will complete this section for each assertion raised.

If multiple parties are involved, all other features will proceed, and a decision will be made. A decision is not made for the party found to be out of jurisdiction.

The following jurisdictional exclusions apply to **New York PIP – Loss Transfer** filings when disputed by the Responding Party.

Step 5: Review the attached **evidence**.

Step 6: Enter comments by selecting the + **tab**. Explain how the evidence proves or disproves the qualifier.

Step 7: Enter your **finding** based on the dispute and evidence submitted. An **in jurisdiction** finding means the case qualifies for arbitration, whereas an **out of jurisdiction** finding bars a ruling on the case.

Step 8: Provide a **justification** for your finding as seen in the example.

Optional Basic Economic Loss (OBEL)

OBEL coverage provides a person with an additional \$25,000 of coverage beyond the no-fault PIP \$50,000 limit.

OBEL coverage gives injured parties the ability to decide which expenses get paid. In some cases, regular no-fault insurance will not provide coverage if psychiatric, physical, or occupational treatments are needed following an accident. OBEL coverage for basic economic loss can be used to pay lost earnings and medical bills but could also be used to cover expenses of in-home help or physical therapy.

Disputes most commonly arise when the Filing Party pays more than the state allowance of \$50,000 but cannot prove OBEL exists on the policy. When the responder disputes OBEL, arbitrators will complete the following steps.

Step 1: Evaluate the Filing Company’s request of OBEL.

Step 2: Review **evidence** to support this request.

Step 3: Enter your **finding** based on the dispute and evidence submitted. An **in-jurisdiction** finding means that OBEL applies to the policy, whereas an **out-of-jurisdiction** finding means OBEL does not apply.

Step 4: Enter a **justification** to support your finding, as seen in the example.

The screenshot shows a web interface for evaluating an Optional Basic Economic Loss (OBEL) request. The title is "Optional Basic Economic Loss (OBEL) Finding - NYPIP" with a help icon. Below the title, a numbered step 1 indicates the task: "Please evaluate ALPHA INSURANCE OF FLORIDA (JJ RIDER)'s Optional Basic Economic Loss (OBEL) request." The name of the insurance company, "ALPHA INSURANCE OF FLORIDA (JJ RIDER)", is displayed. Under the "Evidence" section, there is a "Policy Declarations" link and a comment box with the text "No Comment Added." and a plus sign to add more comments. The "What is your finding?" section contains a question: "Based on the evidence provided, does Optional Basic Economic Loss (OBEL) apply on this policy?" with radio buttons for "Yes" (selected) and "No". Below this, a "Justification" section is marked with a checkmark and contains a yellow highlighted text box: "The Filing Company's Declarations Page shows OBEL listed for an additional \$25,000 of coverage."

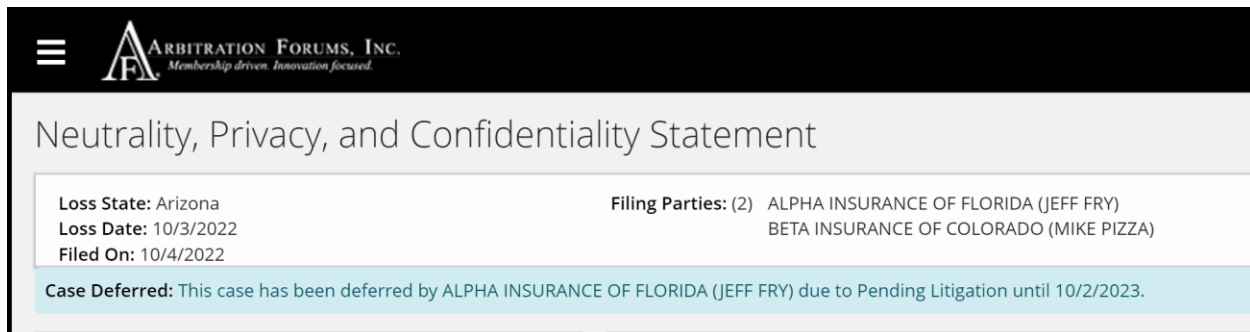

Deferments

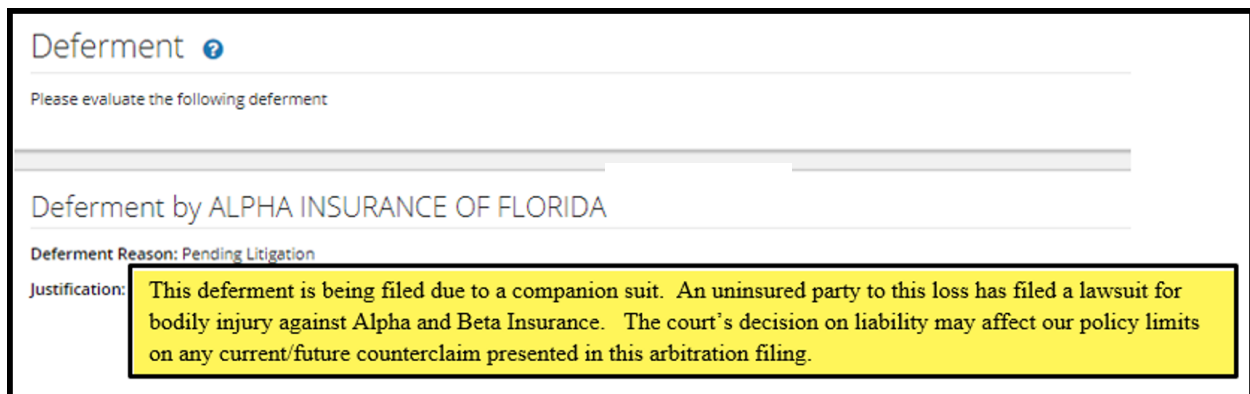

A deferment is a postponement of the liability and/or damages decision for one year from the deferment submission date. A deferment is typically submitted when coverage is pending and under investigation, or a companion claim or suit is pending, and issues must be resolved prior to the arbitration case being heard.

Any party may defer a case. Parties may also challenge the deferment if they believe the one-year postponement is not needed. When a deferment is challenged, arbitrators will determine the validity of the challenge request.

When reviewing a deferment challenge (DC) case, a banner will display at the top providing arbitrators with information regarding which party requested the deferment along with a deferment reason.

The party deferring the case should explain why the case needs to be deferred for one year (what impact the companion claim or suit has on the arbitration case).

Likewise, the challenging party should explain why the one-year deferment is not needed.

Deferment Challenge by BETA INSURANCE OF COLORADO

Justification: Beta Insurance challenges this deferment request. Alpha Insurance alleges the uninsured party has filed a lawsuit for bodily injury. This lawsuit was dismissed on August 15th, 2020 eliminating a policy limits defense. As such, this case should proceed to hearing.

After considering the deferment by the requesting party and the challenge raised by the Adverse Party, review any supporting evidence. See **How to Review Evidence** for more information.

 Court Order

After reviewing the evidence, enter your **finding**.

If the deferment is allowed, select “**Yes**” and provide a **justification**. The case remains in deferred status.

What is your finding?

Is the deferment allowed? Yes No

Justification: The deferment is allowed. The court document submitted is the actual Summons and Complaint and not the dismissal court documents needed.

If the deferment is not allowed, select **No** and provide a **justification**. The deferment ends and the parties are notified.

What is your finding?

Is the deferment allowed? Yes No

Justification: The deferment is not allowed. The court document submitted shows the uninsured party's lawsuit was dismissed. This case can proceed to hearing.

Cases involving a deferment challenge will appear on the Arbitrator Worklist with a deferment challenge (DC) badge.

Rule 2-1

For new Auto filings, attached evidence supporting feature damages sought will be viewable to the Responding Party(ies) for the purpose of the specific arbitration filing and may not be copied for use in any other claim arising out of the same accident.

Filing and Responding Parties should only attach liability evidence in this section. Feature damages sought and disputed damages evidence should be attached in the Feature Damages section.

Failure by the parties to attach evidence supporting feature damages sought or disputed damages in the appropriate section may cause the arbitrator to **not** consider it when a damage dispute is raised.

Removed Parties

Adverse Parties can request to be removed from a case when named improperly. The naming party can remove the Adverse Party and replace it with the correct party. Depending on when a party filed its feature and/or feature response, it may refer to a company name within the liability/recovery arguments that were replaced.

To provide clarity to the arbitrator, a banner now appears on the liability/recovery arguments advising when a party was replaced in the event a company is mentioned, but it is no longer a party to the case.

Based on the liability percentage entered for the Adverse Party, TRS automatically recognizes counterclaims (if applicable). If liability is favorable to the Adverse Party and the negligence

laws permit recovery, a counterclaim will appear as an additional step in the Workflow titled **Damage Recovery**.

Counterclaim for Adverse Party.
 Refer to the **Damage Recovery** section of this guide for instructions on how to complete this step.

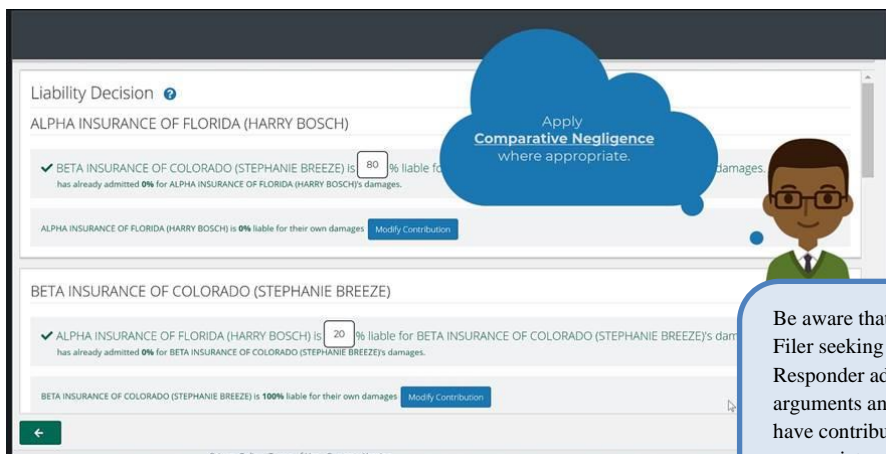

If the Adverse Party admits 100 percent liability, a green banner will appear at the top of the page advising arbitrators to proceed directly to the damages section.

If Adverse Parties do not respond to a case, arbitrators will see in red **Did Not Respond** under the Liability Decision section.

There are **no default judgements** in arbitration. The Recovering/Filing Party does not automatically prevail when Adverse parties do not submit a response. Arbitrators must review the arguments and evidence submitted to determine if the elements of proof were established.

Be aware that cases often go to arbitration, with the Filer seeking 100 percent of their damages while the Responder admits zero liability. When reviewing the arguments and evidence, consider how each party may have contributed to their own damages, and when appropriate, apply comparative negligence.

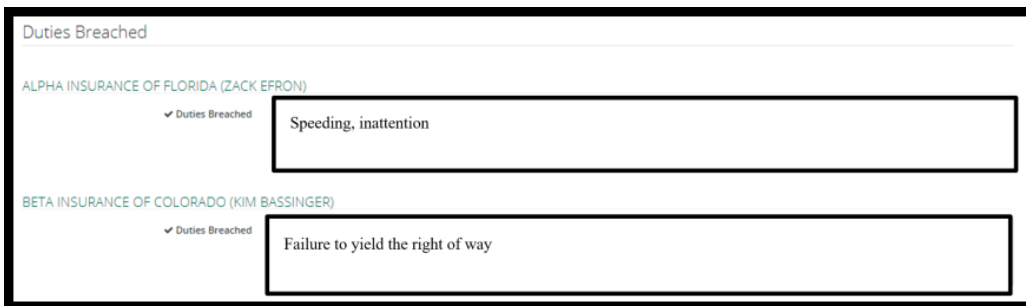

The **Modify Contribution** button allows arbitrators to change the percentage of liability, when applicable.

Fields are provided to enter the **Duties Breached** in support of your liability assessment against each party. Both fields are required, and when completed, the asterisk adjacent to each field changes to a check mark.

Enter only the breach of duty(ies) proven. This section is not intended to address the evidence or rationale for the decision.

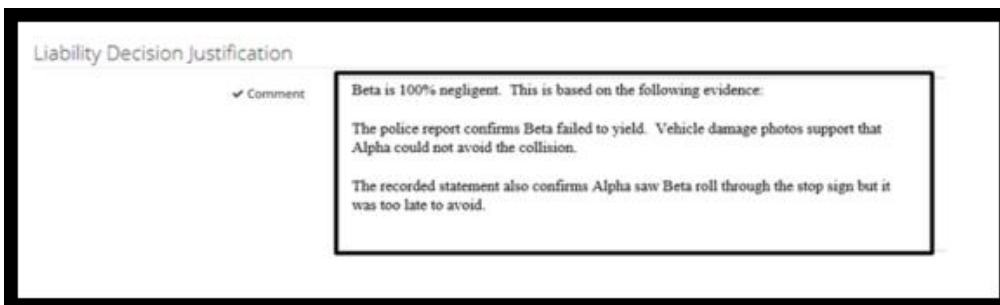

The **Liability Decision Justification** field is your opportunity to expand your comments on the evidence, developing a cohesive decision rationale.

What evidence items proved to you that the breach of duty(ies) you listed were the cause of the accident?

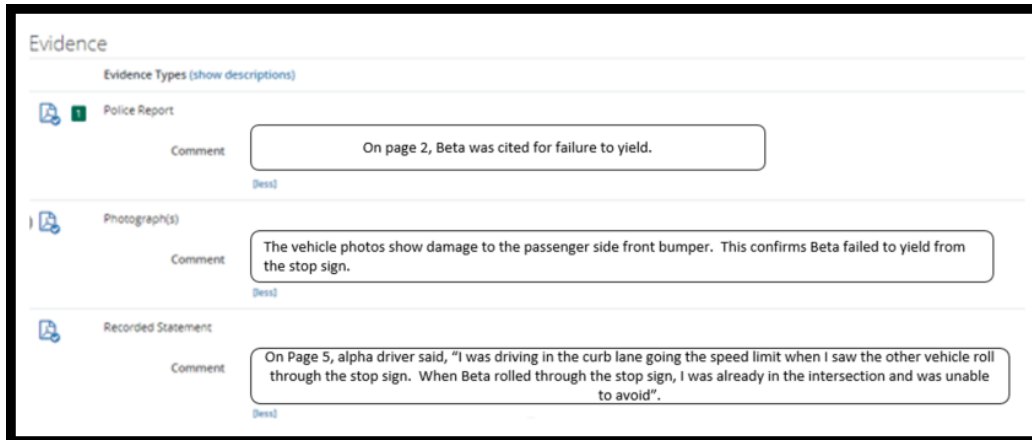

What key elements contained within the evidence influenced your decision?

What conclusions did you reach when comparing the arguments and supporting evidence?

Completing your **Liability Decision Justification** is aided by the visibility of the comments you entered initially from the previous workflow step and can be found at the bottom of the **Liability Decision Workflow Step**.

The comments should address conclusions made during the initial analysis of the evidence.

When completing the **Liability Decision Justification**, arbitrators can reference the original comments to help justify their decision.

Comments can be copied/pasted into the **Liability Decision Justification**.

Comments are preserved for the life of the case and can be viewed by the parties named in the arbitration. For these reasons, it is important to maintain a high level of professionalism when entering comments.

Recovery Decision

When hearing a case involving **Concurrent Coverage/Priority of Payment or Third-Party Contribution (For Concurrent Coverage)**, arbitrators will evaluate the parties for priority of payment for each feature.

Step 1: Evaluate the parties for priority of payment for each feature.

Step 2: Determine who has priority of payment for the Filing company.

Step 3: Enter the priority of payment justification.

WORKFLOW STEPS

ALPHA INSURANCE OF FLORIDA (SARA CROCKER) Damage Recovery

Bill Crocker

The **Damage Recovery Workflow Step** addresses the damage recovery being sought in arbitration. Recovery is dependent on the liability outcome along with negligence laws.

Recovery is also dependent on the party designated with Priority of Payment. Based on these dependencies, the **Damage Recovery Workflow Step** may or may not be enabled.

For **Collision, Comprehensive/OTC** cases, “damages” refer to **vehicles**.

For **Property and Third-Party Contribution (Property Damages)** cases, “damages” refer to **property**.

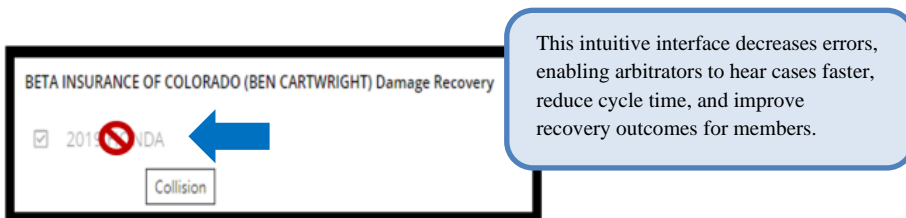

For **PIP, Med Pay, Workers’ Compensation Subrogation, Third-Party Contribution (Bodily Injury), or New York PIP** cases, “damages” refer to **injured parties**.

TRS is intuitive through its ability to recognize a right of recovery based on liability, negligence laws, or primacy on coverage.

The Damage Recovery Workflow Step is enabled when the liability/recovery decision and negligence laws permit recovery. After selecting the step, complete each field where indicated.

This step is disabled when the decision and negligence laws prohibit recovery. This is denoted with the red strikethrough. Proceed to the next step in the workflow.

Liability Decisions

The state of loss determines the recovery outcome regardless of the liability percentage entered. In the example below, the Responding Party, Beta Insurance, is 60 percent liable for Alpha Insurance’s damages.

Loss State: Texas Filing Parties: (2) ALPHA INSURANCE OF FLORIDA (EARL FLEMMING)
Loss Date: 10/2/2022 BETA INSURANCE OF COLORADO (BUD LANCING)
Filed On: 10/4/2022 AF Filing ID: A220000B875-C1-D1
Negligence Laws: 50% Comparative

BETA INSURANCE OF COLORADO (BUD LANCING)

✓ ALPHA INSURANCE OF FLORIDA (EARL FLEMMING) is % liable for BETA INSURANCE OF COLORADO (BUD LANCING)'s damages.
has already admitted 0% for BETA INSURANCE OF COLORADO (BUD LANCING)'s damages.

Because the loss state is Texas where the negligence laws bar recovery of 51 percent and greater, recovery is barred to Beta Insurance for any counterclaim they present. TRS disables counterclaims by displaying a red strikethrough, ensuring damages are not awarded erroneously to the Responding Party.

BETA INSURANCE OF COLORADO (BUD LANCING) Damage Recovery

2015 ~~ORD~~

There are three types of negligence laws:

- **Pure Comparative:** Party can recover less the percentage they are negligent (80 percent negligent means recovery of 20 percent of their damages).
- **Modified Comparative:** 49/51 percent or 50/50 percent. The party deemed 50 percent or 51 percent negligent is barred from recovery.
- **Contributory Negligence:** The party deemed one percent negligent cannot recover.

Recovery Decision

Conversely, negligence laws do not govern recovery outcomes as they relate to **Concurrent Coverage/Priority of Payment** cases. Specific arguments raised under this **Right of Recovery** are not arguments relating to liability, but rather to coverage, policy, and/or contract language as to who is primary to pay for damages.

Concurrent Coverage/Priority of Payment Decision

Please evaluate the parties for Priority of Payment for each feature.

Proof of Damages vs. Proof of Payment

Proof of Damages = Estimates, invoices, medical bills, etc.

Proof of Payment = Checks, drafts, electronic funds transfer (EFT), payment ledgers, etc.

In arbitration, either proof of damages or proof of payment can be submitted to support the feature damages sought. Proof of damages is needed only when the Responding Party disputes specific damages.

In the event a damage dispute is raised, the arbitrator will review the Filing Party's corresponding bill, determine the validity of the damage dispute, and either award all or reduced damages in the appropriate fields.

In the event a damage dispute is raised, and the Filing Party submitted an electronic/digital invoice as proof of damages, it should contain the same information provided as a traditional paper bill (i.e., the breakdown of charges).

Damage Disputes

Damage Disputes raised by the Adverse Party are marked by a red **Disputed** badge next to the damages description.

For new Auto filings, evidence attached supporting disputed damages will be viewable to the Recovering Party and other Responding Parties, if applicable, for the purpose of the specific arbitration filing and may not be copied for use in any other claim arising out of the same accident.

Failure by the Responding Party to attach evidence supporting the disputed damages in the appropriate section (i.e., Damage Dispute section) may cause the arbitrator to **not** consider it.

The **Review** tab describes the damage dispute raised by a Responding Party, including the proposed amount, dispute type, and justification. Damage Dispute descriptions vary based on the Coverage Group selected.

Apportion Damages

This section applies your proven liability decision to the damages awarded. Selecting **Change Apportioned Amount** allows the arbitrator to enter a new **Apportionment amount**.

It is used when the Adverse Party is only liable for a portion of the Recovering Party’s damages. For example, rear damages versus front damages.

Apportion Damages

Change Apportioned Amount

Party	Proven Liability	Apportionment
BETA INSURANCE OF COLORADO (MONEY HONEY)	100%	\$ 750.00

Total Apportioned Amount: \$750.00

Justification: Alpha Insurance proved \$1500.00 in damages. However, Beta Insurance is only responsible for the rear damages caused. Rear damages total \$750.00.

Auto example

This will change the **Total Owed** to the Recovering Party.

Award Summary

Damage Award Summary	Damages	Deductible	Legal Fees	Payments	Total Owed
BETA INSURANCE OF COLORADO (MONEY HONEY), 100% Liable	\$750.00	—	—	—	\$750.00
Company Totals	\$750.00	—	—	—	\$750.00

Regardless of your damages decision, a required **Justification** text box will appear at the bottom of the page for the explanation of your decision reasoning.

* Justification: \$700.00 for medical bills reduced from amount owed. Medical notes and driver’s own statement confirms he had a pre-existing back and neck injury prior to this loss. Medical bills \$10,000 less \$700.00 for reduction = \$9300.00 owed.

Injury example

The required **Justification** box allows you to provide the rationale behind your damages decision. For an award of all damages, explain how the Recovering Party proved all of its damages and why you are rejecting the damages challenge from the Adverse Party.

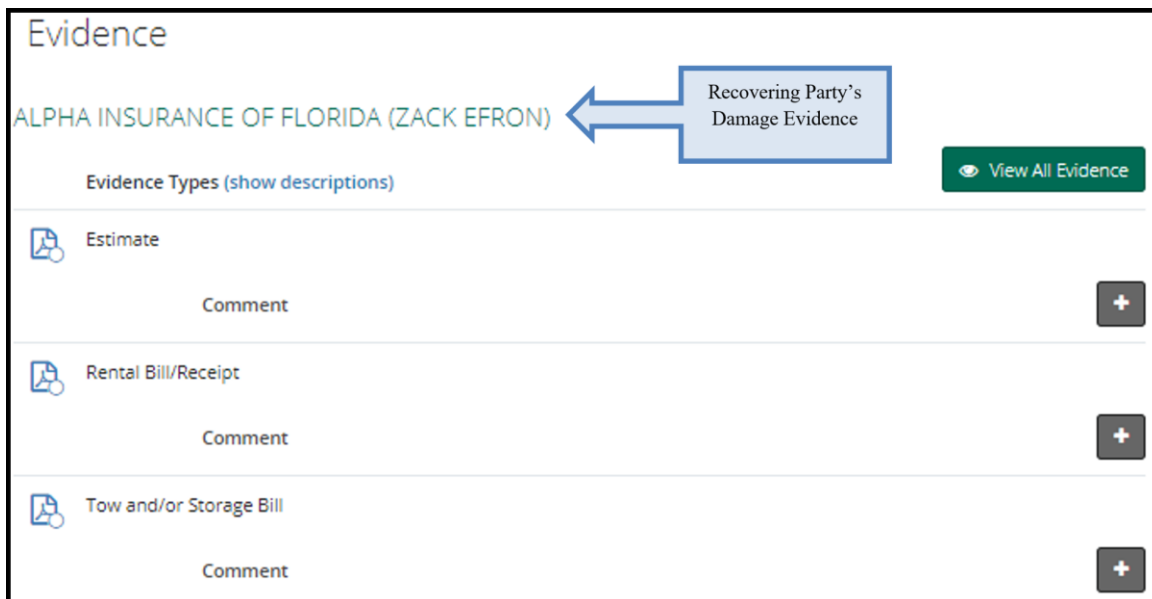

If you did not confirm the amounts, explain why you felt that some or all of the disputed damages were unreasonable and document what evidence supported these findings. **Show the math** that resulted in the reduced damages amount, so there is no confusion regarding the reduced damages figure.

After providing the justification, select the **Done** button.

Evidence

Prior to accepting or reviewing damages, review each party's evidence and enter comments (See **How to Review Evidence** and **Enter Comments** for more information).

Insured Deductible (if applicable)

Confirm the insured deductible sought. An estimate or declarations page will confirm this amount. Once confirmed, select **Accept**.

The net demand plus the amount claimed for the deductible should equal the gross amount of the estimate or ACV.

For example, the Recovering Party seeks to recover its insured’s \$500.00 deductible. However, the estimate supports a deductible amount of \$1,000.00. This discrepancy in deductible amounts may occur because the Recovering Party has issued a partial refund to its insured and is only seeking the difference.

Insured Deductible		Sought	Awarded	Show Details
* Insured Deductible		\$500.00		Accept Review

Recovering deductibles is applicable to Auto and Property cases. However, there may be times when statute allows for recovery of a deductible in PIP cases.

Prior Payments Made

This section is for payments made from the Adverse Party to the Recovering Party or its insured. If the Recovering Party **acknowledged (1)** the payment, no review is needed. An acknowledged payment will automatically be deducted from the award. If the Recovering Party has not **acknowledged** the payment, the arbitrator will review the payment by selecting the **Review (2)** tab to confirm it has been cashed/deposited. This is also true when the Adverse Party asserts a higher payment amount than what the Recovering Party acknowledged.

Party	Acknowledged: \$0.00	Alleged: \$1,500.00	Proven: \$0.00	Show Details

Do not enter a justification as it relates to the Recovering Party’s proven amounts. The intent of the Payments section is to verify and deduct previous payments made to the Recovering Party to avoid situations in which they are paid twice for the same damages.

This section should only include payments made to the Recovering Party or its insured (deductibles) **for damages sought in the case. If the Responding company has issued prior payments, they must be entered in the Prior Payment Made field with proof of payment attached. This includes deductibles and any payments alleged to be a double dip (body shop and/or insured paid twice). This is especially important if there is a policy limit.**

Payment Justification (Correct)

The justification below explains the review of check #1343, showing a status of “deposited/cashed.” This is an indication the Recovering Party has accepted the payment. Policy Limits

Collision - BETA INSURANCE OF COLORADO

The **Policy Limits Worksheet** presents the relationship between the proven policy limits of the Adverse Party and the total proven exposures against the policy that may affect the available limits (**Does not apply to New York PIP or Concurrent Coverage/Priority of Payment**).

Review the related arbitrator resources for more information on Policy Limits – Additional Exposures.

[Policy Limits in TRS Hearings Guide](#)

[Policy Limits- Additional Exposures](#)

There are three types of exposures: Paid, Unpaid, or Undetermined.

Paid Exposures – Proven paid exposures directly impact the policy limits available for the case. These exposures are automatically deducted from the proven policy limits available on the case and can cause a party to be marked as out of jurisdiction (OOJ) by the system. This occurs when the proven paid exposures exceed the policy limits available for the incident or the feature.

Unpaid Exposures – Unpaid exposures are exposures that have not been paid. These exposures result in the OOJ statement being displayed on the policy limits worksheet. The arbitrator must make a decision if these unpaid exposures put a party or feature OOJ.

Undetermined Exposures – Undetermined exposures are exposures that have not been quantified. These exposures result in the OOJ statement being displayed on the policy limits worksheet. The arbitrator must make a decision if these undetermined exposures put a party or feature OOJ.

Paid Exposures

Previously paid exposures in a decision are automatically deducted from the **Proven Policy Limit Amount** to show the **Policy Limit Balance Remaining for Current Decision**. The system will then deduct **Known Exposure – Proven in Current Decision** to determine the **Net Remaining Policy Limit Balance**.

The Net Remaining Policy Limit Balance is \$3,450.00. For the case to remain in jurisdiction, all unpaid or undetermined exposures cannot exceed this amount.

There are times when the **Net Remaining Policy Limit Balance** will total \$0.00. This happens when the exposure exceeds the proven policy limit amount.

Unpaid/Undetermined Exposures

Unlike previously paid exposures, unpaid/undetermined exposures are not automatically deducted by TRS because the amounts are either unknown or have not yet been paid. For example, subrogation demands were not received prior to the filing of a case. In this situation, the arbitrator will make a judgement call, deciding whether the additional exposure will render the case in or out of jurisdiction.

To determine if a case is in or out of jurisdiction, arbitrators will need to compare the **Unpaid/Undetermined Exposures** to the **Net Remaining Policy Limits Balance**.

Unpaid/Undetermined Exposures

Description	Proven Amount

Rear damage to uninsured vehicle involved in accident.	Undetermined
Total	\$3,000.00

* Do these exposures put BETA INSURANCE OF COLORADO (BILLY KID) out of jurisdiction for this case? Yes No

* Justification

In the example above, the **Net Remaining Policy Limits Balance** is \$3,450.00. There are two exposures:

- Damage to homeowner's fence \$3,000.00 (**unpaid**)
- Rear damage to uninsured vehicle (**undetermined amount**)

If the only exposure was for damages to the homeowner's fence for \$3,000.00, the case would remain in jurisdiction.

Remaining Policy Limit amount of \$3,450.00 would cover the \$3,000.00 for the homeowner's fence, ruling the case **in jurisdiction**.

For cases **in jurisdiction**, select **No** to the following question and enter a **justification**.

✓ Do these exposures put BETA INSURANCE OF COLORADO (BILLY KID) out of jurisdiction for this case? Yes No

✓ Justification

Net Remaining Policy Limit Balance is \$3450.00. Exposure for damage to homeowner's fence totals \$3000.00. Leaving a Net Remaining Policy Limit Balance of \$450.00.

However, in this example, the homeowner's fence is not the only exposure. There is a second exposure of undetermined amount for damages to an uninsured vehicle. When reviewing undetermined exposures, arbitrators will use their discretion to determine if the case is in or out of jurisdiction based on the description and supporting evidence. For example, in this scenario, the Net Remaining Policy Limits Balance is \$450.00. Based on the evidence and description of

the second exposure (rear damages to uninsured vehicle), do you believe damages would exceed the remaining balance of \$450.00? Applying your knowledge and industry expertise in this scenario is vital to ensure accurate outcomes.

If damages for the uninsured vehicle will exceed the Net Remaining Policy Limit Balance, select **Yes** and enter a **justification**. This case is now out of jurisdiction (OOJ). OOJ is a status that represents a filing to be excluded from compulsory arbitration’s jurisdiction. A TRS filing with this status allows parties to resolve the dispute by other means.

✓ Do these exposures put BETA INSURANCE OF COLORADO (BILLY KID) out of jurisdiction for this case? Yes No

✓ Justification

The police report and recorded statement from the Recovering Party confirms the impact to the rear of the uninsured vehicle was severe. Because of this, the remaining Net Remaining Policy Limits Balance of \$450.00 is not enough to cover these damages putting the case Out of Jurisdiction.

When additional exposures are added to a case, the Recovering Party’s acceptance of policy limits will not determine if the case is in or out of Jurisdiction. Damages to all parties including additional exposures cannot exceed the **Net Remaining Policy Limits Balance**. If so, the case is out of jurisdiction regardless of who is willing to accept policy limits.

PIP and Med Pay Cases

In PIP and Med Pay cases, arbitrators will need to consider the Per-Person and Per-Incident Policy Limit amount to ensure accurate awards.

Start by reviewing the **Proven Per-Incident Policy Limit Amount**. In this example, the **Per-Incident Policy Limit Amount** is \$10,000.

\$10,000.00 Policy Limits Amount (Per-Incident)
 \$8,579.00 Known Exposure in Current Decision
\$1,421.00 Policy Limits Balance (Per-Incident)

However, if you look at the **Net Remaining Policy Limit Balance**, it indicates a negative balance.

Net Remaining Policy Limit Balance	- ⓘ
---	------------

To ensure the award does not exceed the **Per-Person Policy Limit**, first review the **Proven Per-Person Policy Limit Amount**.

Proven Per-Person Policy Limit Amount	\$5,000.00
Previously Paid Exposures ⓘ	\$0.00
Policy Limit Balance Remaining for Current Decision	\$5,000.00
Known Exposures - Proven in Current Decision ⓘ	\$8,579.00 Details ▼
Net Remaining Policy Limit Balance	\$0.00

In the example above, the **Known Exposure – Proven in Current Decision** is **\$8,579.00**. This amount is determined by the liability proven and damages accepted for the injured party. Because the known exposure (injured party) is more than the per-person policy limit, the **Net Remaining Policy Limit Balance** is **\$0.00**. When this happens, arbitrators will verify if the Recovering Party accepts policy limits.

How to Access Post-Decision Inquiries (PDIs)

When a member has questions about a decision, they create a post-decision inquiry (PDI). If a PDI has been created on a decision you made, the following email is sent to you:

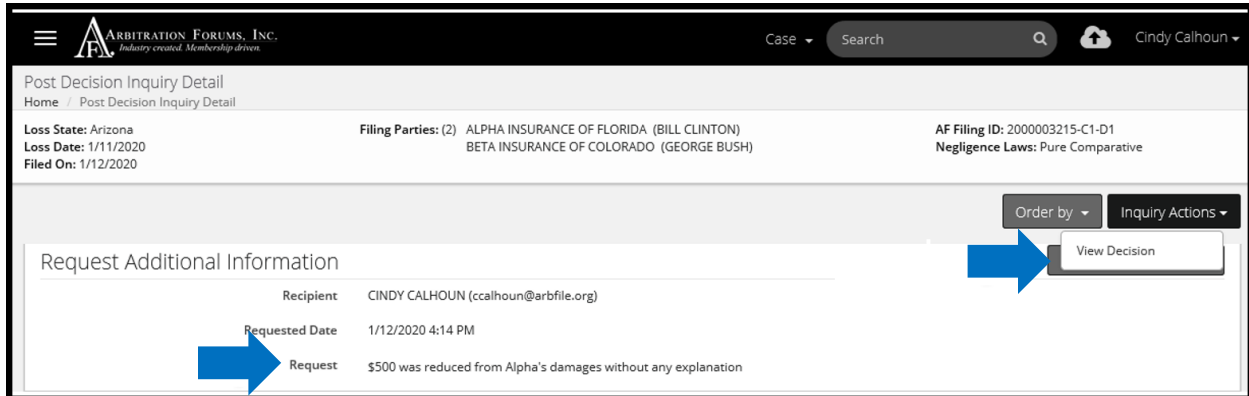

For timely handling of the post-decision inquiry (PDI), please respond to all requests within **24 hours** of receipt. For questions, please contact 1-866-977-3434 or send an email to arbitratorsupport@arbfile.org.

The email also indicates **not** to reply to or forward the email, as the mailbox is not monitored. To enter your decision, respond from within the TRS system.

Below are the steps on how to enter your post-decision inquiry response.

To respond to the inquiry, click the **PDI** link (noted above) that takes arbitrators to the following screen:

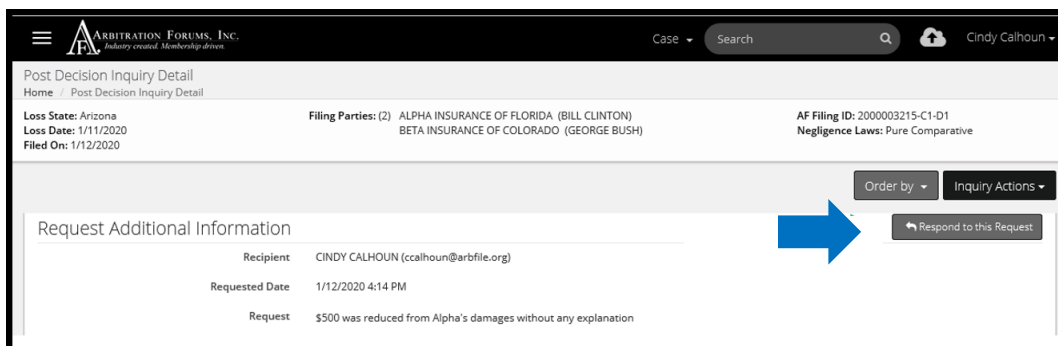

The **Request for Additional Information** screen provides the following details:

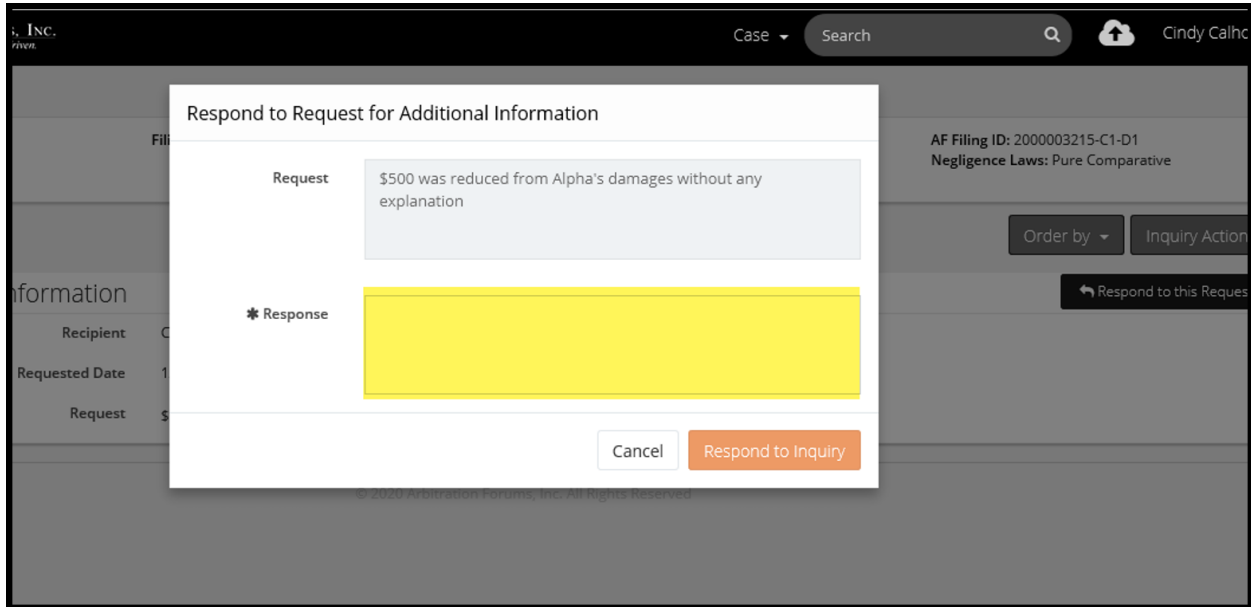

- **Recipient:** Provides the arbitrator’s name
- **Requested Date:** Date the request was made
- **Request:** Provides the reason for the inquiry from the member

To begin, select the **View Decision** tab to review your initial decision.

After viewing the decision details, select the **Respond to this Request** tab to provide an additional explanation for this decision.

Enter additional information in the **Response** field (highlighted below), and then select **Respond to Inquiry**.

Hearing Supplement Cases

Arbitration should not be filed until a claim is concluded. That said, AF realizes that supplemental damages may arise after an initial filing is submitted or heard.

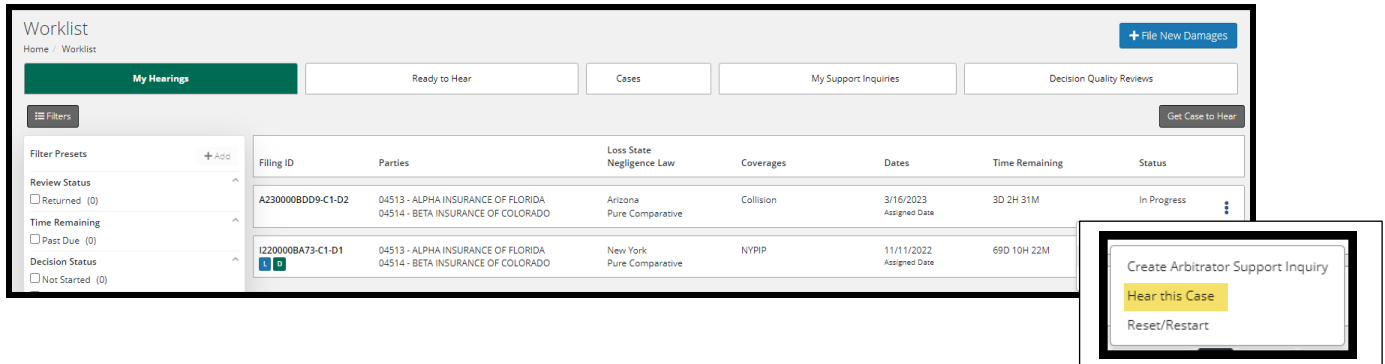

When this occurs, the Responding Party is strongly encouraged to voluntarily reimburse the damages based on the initial liability decision. Arbitration may be filed, however, if the damages are disputed.

When damages are disputed by the Responding Party(ies), arbitrators will handle them in the same manner damage disputes are handled in the original case. To learn how to handle damage disputes, refer to the [Damage Disputes](#) section.

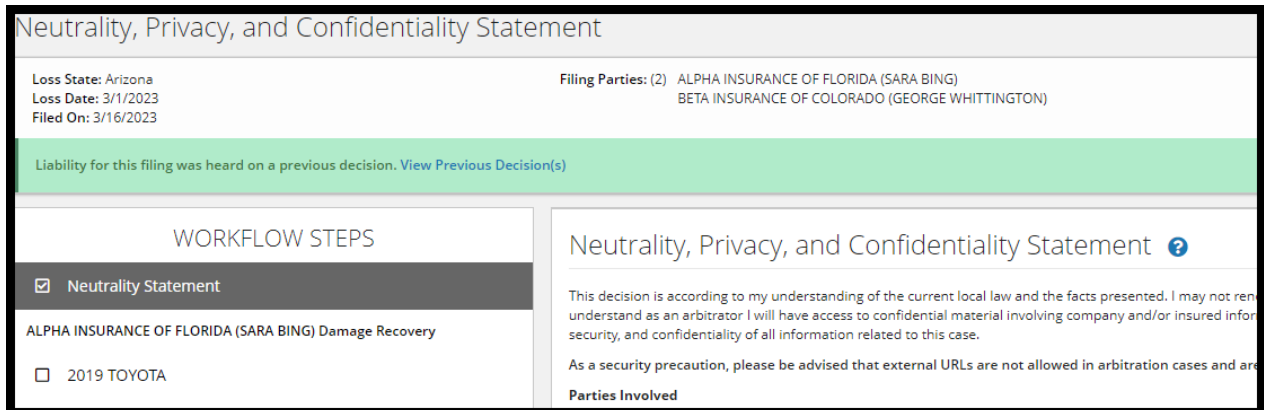

Rule 5-3 outlines when a company can file for supplement damages. Payments must be made on or after the initial filing submit date. It is also important to note that for new Auto filings, evidence submitted by the parties to support or dispute the supplement damages will be viewable by the parties. This is intended to facilitate and expedite settlement of the claim since, many times, a supplement demand is not sent.

In all forums, the original liability decision is binding unto the parties. The sole issue for the arbitrator to consider in the new filing is the supplement damages.

The following provides step-by-step instructions for entering decisions on supplement filings. From the **My Hearings** tab, select **Hear this Case** from the blue ellipsis drop-down menu.

From the Neutrality, Privacy and Confidentiality Workflow Step, the following banner is present.

It indicates that liability for this filing was heard on a previous decision. To view the previous decision select the link.

Review the original **Decision Award** and compare the award to the amount requested in the supplement filing. This is especially true when the Responding Party has entered a prior payment for an amount different than the supplement amount.

Errors applying credit for a prior payment are often made on supplemental filings when the payment is entered in error by the Responding Party and was actually payment of the prior arbitration award.

Here are some tips to ensure credit for the payment is not made in error.

The first indication of a problem is when the entered prior payment amount *exceeds* the supplemental damages sought. For example, the Recovering Party was initially awarded \$5,651.23 (above) and seeks an additional \$315.24 (below) in supplemental damages.

The fact that only \$315.23 is sought should make you question if the \$5,651.23 prior payment applies to the supplemental damages.

View the prior decision to determine if the award amount equals the amount of the prior payment entered on the supplemental filing. Do not apply the credit if it does. By reviewing the previous decision, errors in applying the credit for a prior payment can be avoided.
